Padded barrier for upper bed.

TECHNICAL INFORMATION

Kali Duo Sofa with bunk beds and patented sofa that with a simple movement turns into the night version: when the backrest cushions are removed and the lower bed opens, the sofa with tilting frame pulls back and with a translational motion sets under the bed. All models with a height of cm 220 are provided with an upper storage space with tilting door.

These transforming systems can be independent or integrated with elements of the Young and Living modular programs.

Kali Duo Sofa is self supporting.

Wooden structure with adjustable nylon feet.

Mechanism fitted in the wooden structure through an articulated joint system operating by gas springs and fasteners that stand perfectly tightened in both positions.

Bed base (CF09). Patent ITA No. 1393825 - EU Patent No. 2421409.

Die-cast with laser-cut sheet metal frame, folded and welded, painted with epoxy powder and with wooden slatted base, fixed onto the front panel with no hardware.

Ladder: anodized aluminium with joint details made of nickel-plated die-cast Zama and couplers made of steel welded and moulded.

Protection barriers for upper bed in two versions:

- Standard: made of a steel tube painted with epoxy powder, to be closed by releasing the joints,

- Stuffed: iron core mechanism on three sides, stuffed with cold-foamed polyurethane, with removable fabric covering, to be closed by pushing on the buttons placed on each barrier and duly pinpointed by a fabric insert.

Stuffed reclining headboard: iron core mechanism with padding made of cold-foamed polyurethane with removable cover.

The headboard can be placed on both beds when there is the standard iron barrier, but only on the lower bed where there is the padded barrier.

Mattress locking belts in nylon.

Available mattresses H. cm 18 single cm 80 x 197 weight kg 14-16, in versions spring, memory, memory 7 zones, memory deluxe, latex.
